

CONTENT

00. Scope & Architecture Principles

01. Business Analysis

- └ Business Context
- └ Stakeholder Map
- └ Business Requirements
- └ Business Rules
- └ Business Glossary

02. Process Architecture

- └ Purpose and Process Architecture Approach
- └ Process Landscape
- └ Process Design Principles
- └ Pre-Award and Grant Application Management
- └ Funding Agreement and Project Initiation
- └ Project Change and Funding Management
- └ Budget and Financial Management
- └ Research Team and Project Services
- └ Procurement Management
- └ Reporting, Dissemination and Project Closure
- └ Research Administration Requests and Committee Workflows
- └ Cross-Functional Workflow Controls
- └ RACI Model
- └ Process KPIs and Bottleneck Analytics
- └ Key TO-BE Process Changes
- └ Target End-to-End Process

03. System Analysis

- └ Functional Requirements
- └ Use Cases
- └ System Context
- └ State Models
- └ Validation Rules

- └─ Roles & Permissions
- └─ Integration Requirements

04. Data Architecture

- └─ Data Domains
- └─ Master Data
- └─ Reference Data
- └─ Systems of Record
- └─ Data Ownership
- └─ Data Lifecycle
- └─ Data Governance Rules

05. Data Model

- └─ Conceptual Data Model
- └─ Logical ER Model
- └─ Entity Catalogue
- └─ Attribute Catalogue
- └─ Relationship Catalogue
- └─ Data Dictionary

06. Information Architecture

- └─ Information Taxonomy
- └─ Metadata Model
- └─ Document Classification
- └─ Naming Rules
- └─ Multilingual Model
- └─ Search & Navigation Structure

07. Enterprise Architecture

- └─ Business Capability Map
- └─ Application Landscape
- └─ Data/Application Matrix
- └─ Integration Architecture
- └─ Target Architecture
- └─ Implementation Roadmap
